How to Connect to Your Wine Cellars

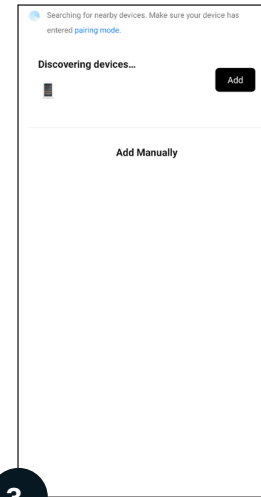

1. Press the 'Add Device' icon on the screen to add a new wine cellar.

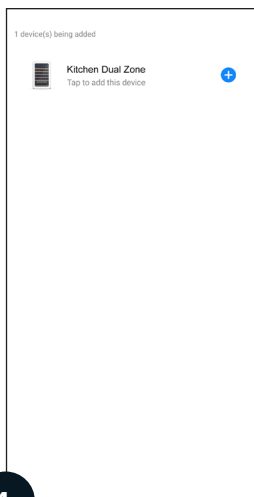

2. The App will automatically search for an available wine cellar.

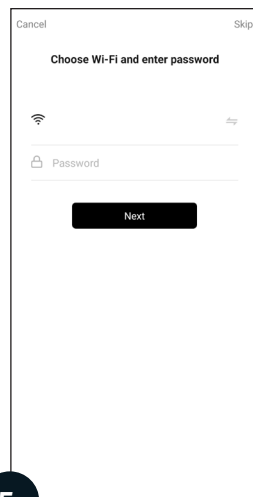

- a. Be sure the App permissions is set to ALLOW Nearby Devices.
- b. Your wine cellar is in pairing mode (Wi-Fi icon is flashing on the temperature display).

3. The App should list Discovering Devices. Press 'Add' on the wine cellar you want to add.

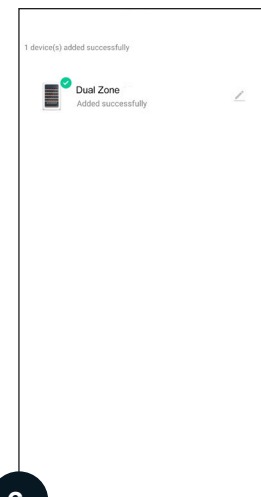

4. The App will list the wine cellar (again). Press the + icon next to the listed cellar.

5. Select your Wi-Fi from the list and then enter the password.

- The Wi-Fi module will connect with 2.4 or 5 GHz routers.
- Press 'Next'.

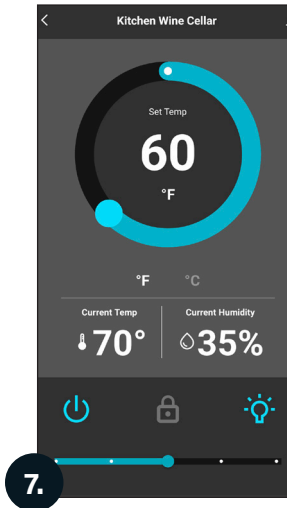

6. Your wine cellar will now connect to the Wi-Fi router, this may take a few minutes, please be patient.

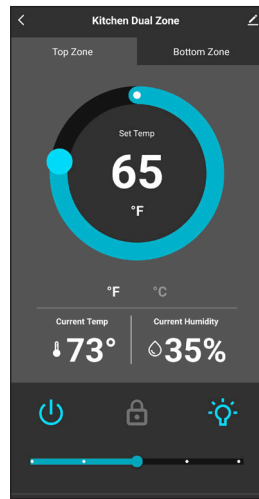

- Press the wine cellar icon to go to the control panel.

How to Connect to Your Wine Cellars

(continued)

SINGLE ZONE

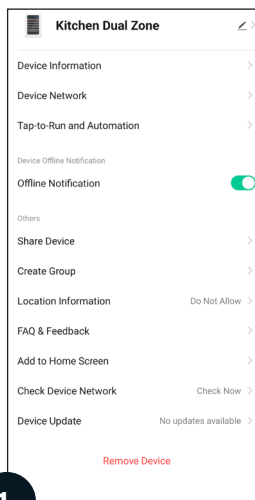

DUAL ZONE
(Dual Zone Wine Cellars Only)

You can view and adjust the temperature by sliding your finger over the wheel.

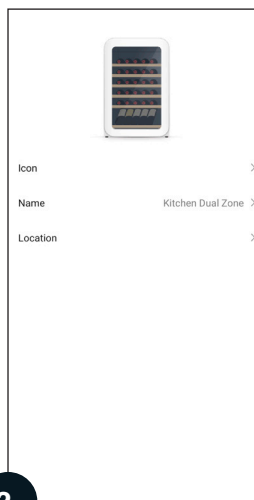

- Change the temperature display from Fahrenheit to Celsius by pressing the F or C, pressing the LOCK icon.
- Lock/Unlock the temperature controls by pressing the LOCK icon.
- Change the intensity of the LED Lighting by sliding the light adjustment bar left to right (0% - 25% - 75% - 100%).
- Turn the Lights ON and OFF by pressing the LIGHT icon.
- To customize the display, press the pencil icon on the top right corner.

Please note: the Current Humidity is not adjustable.

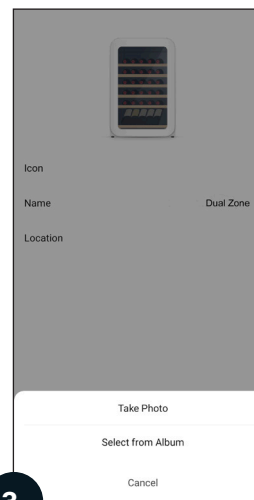

Customizing Settings

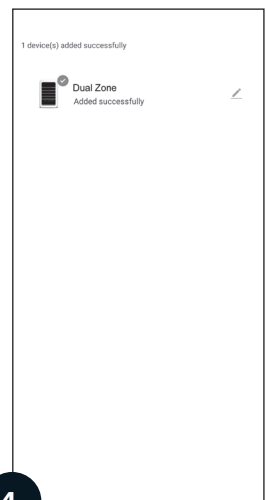

Press the pencil icon on the top right corner of this screen.

To change the name of the wine cellar press the arrow on the right of the name.

To change the image, press the arrow to the right of the word ICON, you can upload a photo or use your camera to take a picture of the cellar you want to add.

You can control multiple units from this one App, press 'Home' to see a list of all connected units.
